PROJECTS

Smart Home IoT System

- Senses human presence and automatically turns fans and lights on/off, improving energy efficiency and convenience.
- Implemented sensors and automation for seamless remote appliance control via simple interfaces.

Invoice Generator System

- Web-based tool to create and download professional invoices with dynamic item entry, auto-totals, and tax fields.
- Designed clean UI using HTML and CSS for freelancers and small businesses to streamline billing.

ACHIEVEMENTS

- **Best Project Award:** Recognized at department level for Smart Home IoT System.
- **Research Publication:** Published "Accuracy in Cloud Security Systems" at an International Conference.
- **Pitchfest:** Presented an innovative idea at this international-level college event.
- **Quiz 2025:** Reached the finals in an inter-college quiz competition.
- **Singing — First Prize:** Won first place in college-level competitions and achieved top prizes across 15+ colleges.
